OBJECTIVE

Dedicated App developer deeply invested in technology and innovation. With a strong foundation in computer science, I thrive on solving challenges and exploring new possibilities. Eager to adapt and grow alongside the rapidly evolving tech industry, I bring a dedicated and enthusiastic approach to every project. Committed to continual learning and contribution.

SKILLS

Flutter / Dart Programming

- Responsive and user-friendly UI
- RESTful API integration
- State management (GetX, Riverpod)
- Firebase/Firestore

Backend Development

Nodejs

Tools & Techniques

Github, Chatgpt, Canvas

Database & Version Control

Git, Github, MySQL, Firebase, MongoDB

EDUCATION

Bachelors of Computer Science and Information Technology.
NED University of Engineering & Technology

2020 – Present

Status - Completed

PROFESSIONAL EXPERIENCE

Flutter Developer (Intern)

Oct 2023 – Dec 2023

Bitrix Solutions

- Developed a **Medical Consultation App** that streamlined appointment scheduling using Flutter and GetX for state management. Designed a seamless user interface to enhance user experience.
- Collaborated with cross-functional teams to ensure the app's scalability and performance.
- Gained expertise in Flutter's state management and UI optimization techniques.

Junior Flutter Developer

Jan 2024 – Oct 2024

GalvanAI

- Built an **AI-based Journal App** integrating SQLite for offline storage and AI-based text summarization. Implemented features like speech recognition and transcription, subscription management using Stripe, and offline handling for a smooth user experience.
- Designed and implemented a **Donation App** connecting donors and organizations, ensuring data security and user-friendly interactions.
- Contributed to the **ResQ App**, a platform offering vehicle services such as towing and repairs, focusing on robust backend integration and intuitive UI.

PROJECTS

Social Media App, Flutter, Firebase, Cloud Messaging, Provider

- Developed a **Social Media App** which facilitates users to **post thoughts** and engage with each other.
- App contains the **push notifications** to notify the users about the engagements

Expensio App, Flutter, Isar, Riverpod

- An **expense tracker** App to track the daily **expenses** of user to keep them in the budget.
- This app contains uses local database called **Isar** for the storage.

Aidance, Flutter, Getx, Foundry

- During my final year project, I developed a **blockchain-based humanitarian aid app** using GetX for state management. This app focused on transparent and traceable aid distribution.

You can explore more on my Github.

AWARDS

App Development Competiton Winner

2023

Spectrum Event. Hosted by **DHA SUFFA UNIVERSITY**

Developed a flutter weather app with team that exhibits the weather updates and statistics of different locations using APIs.
